SA International Releases Flexi 8.6v2 and PhotoPRINT 6.1v2

Salt Lake City, UT – March 16, 2009 – SA International (SAi), the leading provider of Solutions for the Professional Sign Making, Large Format Digital Printing and CAD/CAM for CNC Machining Industries, releases Flexi 8.6v2 and PhotoPRINT 6.1v2 for Microsoft Windows™.

The newest Flexi and PhotoPRINT update integrates key customer feedback, important enhancements and new features. Some highlights include:

- The ability to create multiple contour paths, customize path styles, assign colors to each path and adjust different settings for each contour.
- Improvements for Ink Split in the Color Profiler, including better default settings, greater control over smoothing and the ability to import information.
- Enhancements to SO Diffusion that make this revolutionary dithering pattern faster and even more accurate.

This new release is now shipping with all new Flexi and PhotoPRINT packages for Microsoft Windows. It is available as a free update to customers operating Flexi 8.5 for Windows or later. Registered users with earlier software versions qualify for special upgrade pricing.

“Although Flexi is a feature-rich sign design tool, the staff at SAi never stop listening to what our customers are saying about it,” states Sarit Tichon, Senior VP of Worldwide Sales and Marketing. “That’s why we’re able to give users meaningful software updates that will boost the way they work.”

About SA International

SAi is recognized as a global leader in providing complete, professional solutions for the sign making, digital printing and CNC machining industries. The Company’s solutions help turn creative ideas into reality by providing world-class design and editing tools geared for production. Headquartered in Salt Lake City, Utah, SAi has additional offices in Belgium, Brazil, and Japan.
