SA International Releases PhotoPRINT 6 for Macintosh

Philadelphia, PA – September 11, 2008 – SA International (SAi), the leading provider of Solutions for the Professional Sign Making, Digital Printing and CAD/CAM for CNC Machining Industries, announces the release of PhotoPRINT™ Family 6 for Macintosh.

The PhotoPRINT Family of products are designed to give customers solutions tailored to different workflow environments. Small to medium production users can choose from either PhotoPRINT SE or DX, engineered specially for their OS 10.4 or 10.5 Macintosh computers. Large production environments will continue to choose the PhotoPRINT SERVER or SERVER-PRO products for Windows to accept both PC and Mac files over their network. The New PhotoPRINT 6 Macintosh products now open up even more opportunity for OSX users, giving them the latest design and production tools for print, cut and hybrid print/cut jobs.

The true native application, PhotoPRINT 6 Mac is a universal binary application designed for Intel and PowerPC Macintosh computers with OSX Leopard or OSX Tiger. Incorporating a multitude of new and improved design, production and color management features, this newest PhotoPRINT Mac release far surpasses previous versions for Macintosh. Users will enjoy enhancements like increased processing speed, a fresh user interface, customizable shortcuts, expanded drivers for the latest printers and cutters, improved preset management and more. The highly-anticipated program is now available for purchase through SAi's network of resellers.

"These new PhotoPRINT 6 Mac products," says Sarit Tichon, Senior Vice President of Worldwide Sales and Marketing for SAi, "answer the call from Mac users by offering several different workflow solutions for different Mac printing workflows."

About SA International:

SAi is recognized as a global leader in providing complete, professional solutions for the sign making, digital printing and CNC machining industries. The Company's solutions help turn creative ideas into reality by providing world-class design and editing tools geared for production. Headquartered in Philadelphia, Pennsylvania, SAi has additional offices in Belgium, Brazil, China, Japan, Germany and Puerto Rico.
