Scanvec Amiable Announces the Release of Lenticular Software

Philadelphia, PA, June 16th, 2003 – Scanvec Amiable has announced the release of two new software packages for the design and output of specialty lenticular images. These will offer sign and print shops an integrated solution that will expand the capabilities of existing wide-format printer, laminator and FlexiSIGN-PRO or PhotoPRINT DX.

FotoMOTION is a special add-on option for *FlexiSIGN-PRO* v7 and *PhotoPRINT DX* v3. The renowned Flexi interface expands to allow the user to easily create, edit and output eye-catching lenticular images from the standard to the revolutionary:

2D Flip	Animation
3D Layered	3D Impactio stereo files

IMPACTIO is a revolutionary package capable of analyzing a sequence of digital images into a single interlaced image with true 3D stereoscopic depth. This new 3D stereo is much more realistic in comparison to typical 3D Layered images. Although very complicated calculations are processed in the background, the user prompts and menus are clear and logical. Impactio files can be saved and shared for final output from *FotoMOTION*.

Market opportunities for these lenticular images include:

Outdoor Advertising	Point Of Purchase signage
Tradeshow Graphics	Packaging
Vending Machines	Casinos
Amusement Parks	Photographic Specialties

About Scanvec Amiable:

Scanvec Amiable is the recognized global leader, enabling the graphics manufacturing industry in creating innovative and cutting edge displays. Scanvec Amiable offers complete and professional solutions for the sign making, digital printing, and CAD/CAM for CNC manufacturing industries. Headquartered in Philadelphia Pennsylvania, Scanvec Amiable has additional offices in California, Belgium, Puerto Rico, Beijing, China and Russia.
